Professional Summary

Fullstack Software Engineer with **8+ years of experience** in building scalable web applications, micro-service/micro-frontend, and enterprise solutions. Expertise in **MERN stack, Nest.js, RabbitMQ, Redis, Elasticsearch, PostgreSQL, MongoDB, MySQL, Docker, K8s, Cloud Integration** and many more**.** Proven ability to handle end-to-end development, client management, and team mentoring. Additional experience in **Cyber Forensics and Cyber Security**, providing a unique edge in secure system design and compliance. Adaptable engineer with experience across modern JavaScript/TypeScript ecosystems and diverse technology stacks.

Core Technical Skills

Languages & Frameworks: JavaScript, Nest.js, TypeScript, Node.js, Sails.js, React.js, Angular.js, Vue.js, Next.js, Python
Databases: PostgreSQL, MySQL, MongoDB, Redis, Firebase, GraphQL
ORMs: Prisma, Mongoose, Sequelize, Sails Waterline ORM, MikroORM
Messaging & Search: RabbitMQ, Kafka, Elasticsearch
Cloud & DevOps: Docker, Kubernetes, AWS (Lambda, S3), Azure
Cybersecurity & Forensics: VAPT, Digital Forensics, Data Recovery, Ethical Hacking
Architecture: Multi-tenancy SaaS, Microservices, Micro-frontends, Event-Messaging System, REST
Tools & Practices: Git, Jira, Azure, Agile/Scrum, VS Code, Copilot, ChatGPT, Claude, Gemini
AI Tools & Automation: Cursor, OpenAI Codex, Claude Cowork, n8n, Make.com, Pinecone, Power BI, LLMs, RAG, MCP, Prompt Engineering

Professional Work Experience

Sr. Software Engineer | Fullstack – Node.js, Nest.js, PostgreSQL, Azure, Prisma, Angular 18
Programming.com, Pune Feb 2026 – Oct 2026

- Built multi-tenant SaaS application with Nest.js, PostgreSQL, Prisma ORM, Angular, Azure Cloud integration
- Implement RLS (Row Level Security) for DB level security
- Upload/Download image/pdf files to/from Azure storage with secure access

Sr. Software Engineer | Fullstack – MERN, Nest.js, MySQL, Sequelize, Prisma, Mongoose, MikroORM, RabbitMQ, Docker, K8s, Microservice, Micro-Frontend, Webpack Module Federation
Triveni Global Software Services, Surat Apr 2025 – Dec 2025

- Designed microservices using Nest.js, RabbitMQ, MongoDB
- Built Enterprise Search with Elasticsearch & chunk-based ingestion, Kafka ETL for MySQL operations, also created benchmark performance matrix for client and server-side data operations
- Build and expose reusable components through Webpack Module Federation using a micro-frontend architecture.
- Automated deployments with Docker & Kubernetes
- Build, manage and rectify windows Batch or Poweshell scripts that are required to install/setup Project key configurations which are mandatory to run each individual micro-service, micro-frontend projects. The configured keys are managed through Redis database.

Note: Due to Project Insufficiency; Was on Bench Resource, LWD: 13/10/2026, Immediate Joiner **2026/10/27**

Sr. Software Engineer | Fullstack – MERN, Sails.js, Mongoose
InfineIT Global Services LLP, Surat Nov 2023 – Jan 2025

- Developed fullstack apps with Sails.js, Node.js, React.js with mongoose ODM, WhatsApp API integration
- Mentoring juniors for the support in well-structured coding
- Managed multi-domain diamond ERP with multilingual support
- Optimized backend APIs and real-time notifications

Sr. Software Engineer | Fullstack – MERN/MEAN, Vue.js, Next.js
Alita Infotech, Surat (Rejoined) Oct 2021 – Aug 2023

- Led project delivery & client communication, mentored juniors
- Built apps with React.js, Angular.js, Vue.js, Next.js
- Enhanced DB & API performance with MongoDB + MS SQL

Sr. Forensic Consultant | Cyber Crime Investigation
Maharashtra Cyber, Mumbai Jul 2022 – Sep 2022

- Investigated modus operandi (MO) and supported search operations in digital crime investigations
- Supported forensic data recovery & investigation assistance

Cyber Forensic Analyst | Digital Forensics, VAPT
FORnSEC Solutions, Nagpur Jul 2021 – Aug 2021

- Conducted examination of audio, video, and image files for forensic investigation.
- Performed data recovery from various storage devices.
- Generated 65B certificates for legal admissibility of digital evidence.
- Created hash value reports to ensure integrity and authenticity of recovered data.

Software Engineer I | Frontend – React.js, Apollo GraphQL, Gatsby.js
Everestek Technosoft Solutions, Surat Jul 2019 – Jul 2020

- Built UI with React.js, Gatsby.js, Apollo GraphQL, AWS Lambda
- Improved user experience through API integration

Programmer Analyst | Frontend – Angular.js, React.js
Coruscate Solutions, Surat Jan 2018 – Jul 2019

- Developed dashboards & responsive UI with Angular.js & React.js
- Integrated APIs & built admin features

****My professional journey started in June 2015 as an frontend Angular.js developer.**

Note: Due to Project Insufficiency; Was on Bench Resource, LWD: 13/10/2026, Immediate Joiner **2026/10/27**

Key Projects

EyeonIT – Multi Tenant Logistics Platform (SaaS): A logistics platform to handle multiple tenants with their customer to handle their shipments, implement RLS (Row Level Security) for DB security, Redis for caching, Azure storage to handle large image/pdf files and allow option securely view files or download multiple files at time. (Nest.js, Redis, Prisma ORM, PostgreSQL, Azure, Angular 18)

Enterprise Global Search (Q2C): Built Elasticsearch pipeline with chunk-based ingestion & retrieval. (Node.js, RabbitMQ, Elasticsearch, Kafka, ETL, MySQL, Prisma ORM)

Inovaxe Smart Cart Solution (Q2C): Developed microservice app for smart cart simulation using Nest.js, Fastify, MongoDB, RabbitMQ, MikroORM, Docker, K8s.

Q2C (Quote 2 Cash) Automation: A single project setup automation (10+ subprojects | microservice) from installation to configuring environment for each project for running on windows system. A key database is Redis, where all the key-value pairs for configurations are stored. Resolved defects and enhanced automation scripts, that was built on Batch scripts & PowerShell.

Basler Pylon POC (Q2C): Designed a proof-of-concept software for the EMS (Electronic Manufacturing Service) industry to capture and process barcodes, OCR text, and brand logos from packaging slips, strip reels, and documents. Explored Pylon Viewer vTools along with Dynamsoft, LeadTools, and Azure image processing solutions. Implemented using C++, .NET, and JavaScript.

Finestar Diamonds: Managed large-scale Diamond ERP with inventory, KYC, orders, multilingual features. (React.js, Node.js, Sails.js, AWS S3, MongoDB, MsSQL, .Net)

ATM Management System: Developed from scratch multi-lingual ATM management web-app with React.js & .NET Core.

Kiran HK: Developed and managed client and admin panel applications with seamless backend API integration using Axios. Built features for media upload, inventory import/export (Excel/CSV/PDF), and advanced reporting. Designed client-side diamond grid with sorting, filtering, lazy loading, column control, and integrated secure payment APIs. (Angular.js, Angular Material, AG Grid, UI Grid, Angular UI Router, Node.js, MongoDB).

Education

Master of Computer Applications (MCA), Gujarat Technological University | 2011 – 2014 | CGPA: 7.93
Bachelor of Computer Applications (BCA), VNSGU, Surat | 2008 – 2011 | Percentage: 72.58%

Certifications | All Certs

- AI Tools ISO 9000 Certifications – Be10x (Aug 2026 - In Progress)
- Cyber Security Internship – Gurugram Police (Jul 2021)
- French Language Certification – Internshala (Mar 2021)
- Ethical Hacking Certification – Internshala (Dec 2020)
- Ethical Hacking & Countermeasures Expert – U.S. Council (Jun 2018)
